FEED GRAINS AND WHEAT ABOVE LAST YEAR

Stocks of the four feed grains (corn, sorghum, oats and barley) totaled 242 million metric tons on January 1, 1986, up 33 percent from January 1 last year and 56 percent more than January 1, 1984. Wheat stocks, at 69.0 million metric tons, were up 18 percent from January 1 a year ago and up 9 percent from January 1, 1984.

CORN stored in all positions on January 1, 1986 is estimated at 7.88 billion bushels (200 million metric tons), 34 percent more than the January 1, 1985 total of 5.86 billion bushels (149 million metric tons). Of the total corn stocks on hand January 1, 1986, 70 percent, or 5.53 billion bushels (140 million metric tons), was stored on farms. This is 28 percent more than the January 1 farm stocks a year ago. Off-farm stocks, at 2.35 billion bushels (59.7 million metric tons), are 51 percent above January 1, 1985.

Indicated disappearance from all storage positions during October-December 1985 totaled 2.37 billion bushels (60.2 million metric tons), down 6 percent from the comparable quarter a year ago.

SORGHUM in all storage positions on January 1, 1986 totaled 990 million bushels (25.1 million metric tons), up 37 percent from January 1 a year earlier. On farm stocks of 327 million bushels (8.32 million metric tons) are up 43 percent from January 1, 1985. Off-farm holdings, at 662 million bushels (16.8 million metric tons), are up 33 percent from January 1 a year ago. Indicated disappearance from all storage positions during October-December 1985 is 394 million bushels (10.0 million metric tons), fractionally above the disappearance during the same period a year earlier.

OATS stocks in all storage positions on January 1, 1986 totaled 379 million bushels (5.49 million metric tons), up 6 percent from January 1, 1985. Farm stocks, at 310 million bushels (4.50 million metric tons), are 3 percent more than on January 1 a year ago. Off-farm holdings, at 68.4 million bushels (993 thousand metric tons) are up 18 percent from a year earlier. Indicated disappearance during October-December 1985 is 132 million bushels (1.92 million metric tons), 13 percent more than the corresponding period a year ago.

A 92.15:

BARLEY stored in all positions on January 1, 1986 totaled 534 million bushels (11.6 million metric tons), 22 percent more than January 1 a year ago and 45 percent more than January 1, 1984. Of the total barley stocks on hand January 1, 1986, 68 percent, or 365 million bushels (7.95 million metric tons), was stored on farms. Farm stocks are 19 percent above a year earlier. Off-farm stocks, of 168 million bushels (3.67 million metric tons), are up 30 percent from January 1, 1985. Indicated disappearance during October-December 1985 is 121 million bushels (2.64 million metric tons), 12 percent less than the corresponding period a year ago.

ALL WHEAT stored in all positions on January 1, 1986 is estimated at 2.54 billion bushels (69.0 million metric tons), 18 percent more than the 2.14 billion bushels (58.3 million metric tons) on hand January 1, 1985. Wheat stored on farms accounts for 1.02 billion bushels (27.8 million metric tons), or 40 percent of the total stocks on January 1, 1986. Off-farm stocks total 1.51 billion bushels (41.2 million metric tons). Farm stocks are up 10 percent from January 1, 1985, while off-farm stocks are up 25 percent. Indicated disappearance from all storage positions during Oct-Dec 1985 is 435 million bushels (11.8 million metric tons), down 28 percent from the 602 million bushel (16.4 million metric ton) disappearance during the comparable period in 1984.

DURUM WHEAT in all storage positions on January 1, 1986 is estimated at 150 million bushels (4.09 million metric tons), up 14 percent from the 132 million bushels (3.60 million metric tons) on hand a year earlier. Farm stocks are placed at 112 million bushels (3.04 million metric tons), up 17 percent. Off-farm stocks are 4 percent more than the January 1, 1985 level. Indicated 85-86 marketing year-to-date (June 1 - January 1) disppearance from all storage positions is 62.1 million bushels (1.69 million metric tons), down 11 percent from the comparable period a year ago.

SOYBEANS in all storage positions on January 1, 1986 totaled 1.76 billion bushels (48.0 million metric tons), up 24 percent from January 1, 1985 and 37 percent above January 1, 1984. Farm stocks, at 927 million bushels (25.2 million metric tons), increased 21 percent from last January 1. Off-farm stocks, at 837 million bushels (22.8 million metric tons), are up 28 percent from January 1, 1985. The September-December 1985 indicated disappearance, based on supply and January 1 stocks, is 650 million bushels (17.7 million metric tons), up 6 percent from the 615 million bushel (16.7 million metric ton) disappearance during the same period a year ago.

OFF-FARM GRAIN STORAGE CAPACITY

Capacity of off-farm commercial grain storage totaled 8.25 billion bushels in the United States on January 1, 1986. Capacity increased 1.7 percent from last year's revised capacity figure of 8.11 billion bushels. Increases in capacity occurred in 29 States and New England, 11 States registered declines, and 2 States remained unchanged from January 1, 1985.

Illinois continues to lead all States in total storage capacity followed by: Iowa, Kansas, Texas, and Nebraska. The top 5 States account for 52 percent of the Nation's off-farm storage capacity.

State capacity data include all elevators, warehouses, terminals, merchant mills, other storages, and oilseed crushers which store grain, soybeans, sunflower, or flaxseed. Capacity data exclude warehouses used to store only rice or peanuts, oilseed crushers processing only cottonseed or peanuts, tobacco warehouses, seed warehouses, and storages that handle only dry edible beans.

NUMBER OF OFF-FARM GRAIN STORAGE FACILITIES

Off-farm grain storage facilities totaled 13,770 on January 1, 1986, 151 fewer than on January 1, 1984. States with the largest number of facilities include: Kansas-992, Illinois-980, Iowa-941, Texas-874, and Minnesota-806.

Data users are advised that some differences may exist, between States, in the procedure for making counts of facilities in the grain storage universe. In a few instances, the count includes only the headquarters which report for more than one facility. This does not affect the data on total capacity.

HOW TO ORDER

- *Check appropriate box.
- *Calculate the total charges for subscription and enter below.
- *If your address is outside the United States, use "foreign" price.
- *Make check or money order payable to USDA/SRS.
- *Do not send cash.
- *Allow 2 weeks for processing.
- *For additional information about reports and ordering, call (202) 447-4021.
- *Mail this entire order form: CROP REPORTING BOARD PUBLICATIONS
  ROOM 5829, SOUTH BUILDING
  U.S. DEPARTMENT OF AGRICULTURE

RELEASED: April 29, 1986
3:00 P.M. ET

CORN stored in all positions on April 1, 1986 is estimated at 5.95 billion bushels (151 million metric tons), 50 percent more than the April 1, 1985 total of 3.97 billion bushels (101 million metric tons). Of the total corn stocks on-hand April 1, 1986, 67 percent, or 3.98 billion bushels (101 million metric tons), was stored on-farms. This is 40 percent more than the April 1 farm stocks a year ago. Off-farm stocks, at 1.97 billion bushels (49.9 million metric tons), are 74 percent above April 1, 1985.

Indicated disappearance from all storage positions during January-March 1986 totaled 1.95 billion bushels (49.4 million metric tons), up 2 percent from the comparable quarter a year ago.

ALL WHEAT stored in all positions on April 1, 1986 is estimated at 2.12 billion bushels (57.8 million metric tons), 27 percent more than the 1.67 billion bushels (45.4 million metric tons) on hand April 1, 1985. Wheat stored on-farms amounted to 799 million bushels (21.8 million metric tons), up 12 percent from April 1 a year ago. Off-farm stocks, at 1.32 billion bushels (36.0 million metric tons), are 62 percent of total stocks. The off-farm total is up 39 percent from April 1, 1985. Indicated disappearance from all storage positions during January-March 1986 is 402 million bushels (11.0 million metric tons), down 15 percent from the 474 million bushel (12.9 million metric ton) disappearance during the same period in 1985.

DURUM WHEAT in all storage positions on April 1, 1986 is placed at 136 million bushels (3.70 million metric tons) up 18 percent from a year earlier. Farm stocks total 89.2 million bushels (2.43 million metric tons), 9 percent more than the April 1, 1985 total on-farms. Stocks off-farms, at 46.6 million bushels (1.27 million metric tons), are 41 percent higher than the previous April 1 level. Indicated disappearance during January-March 1986 is 14.3 million bushels (388 thousand metric tons), off 18 percent from the same period a year ago.

****

NOTICE

See page 2 for recently announced program changes to the Grain Stocks estimating program.

AGENCY NAME CHANGE

The Statistical Reporting Service staff has been active during the past 3 years examining virtually every aspect of its work. One phase dealt with the Agency's identity within the agricultural and statistical communities. As a result of this study, the name of the Statistical Reporting Service has been changed to National Agricultural Statistics Service. This name more accurately reflects the purpose of the Agency, its broad agricultural focus, and the service aspect of its responsibility. In line with this change, the Agency's Crop Reporting Board has been renamed the Agricultural Statistics Board to better describe the scope of its output.

****

For Information Call: (202) 447-3843

A 92.43:

SOYBEANS stored in all positions on April 1, 1986 totaled 1.18 billion bushels (32.0 million metric tons), up 31 percent from the 896 million bushels (24.4 million metric tons) in storage on April 1, 1985. Farm stocks, at 599 million bushels (16.3 million metric tons), were up 23 percent from the April 1, 1985 total of 487 million bushels (13.3 million metric tons). Off-farm stocks were estimated at 577 million bushels (15.7 million metric tons), up 41 percent from the 409 million bushels (11.1 million metric tons) on April 1, 1985.

Indicated disappearance from all storage positions during January-March 1986 totaled 589 million bushels (16.0 million metric tons), 12 percent above the same period in 1985. Indicated disappearance for the marketing year, at 1.24 billion bushels (33.7 million metric tons), is 9 percent above the previous year to date disappearance of 1.14 billion bushels (31.0 million metric tons).

GRAIN STOCKS ESTIMATING PROGRAM CHANGES

The following program adjustments were necessary because of reduced funding in fiscal year 1986 and begin with this report.

- Quarterly on-farm and off-farm stock estimates for barley, oats, sorghum, and sunflower are discontinued. However, the Agency will publish end-of-marketing-year stocks for barley and oats in the June "Grain Stocks" report, and for sunflower and sorghum in the September issue. Sorghum stocks will be published in the June and September "Grain Stocks" reports.

- On-farm stock estimates of grains and oilseeds for minor States will not be published separately but will be shown as an unallocated total. Estimates for published States account for 90 percent or more of the total U.S. production for each crop. Estimates for the United States are continued.

- Rye stock estimates for Georgia, Minnesota, North Dakota, and South Dakota will continue to be published in the June "Grain Stocks" report.

- The grain stocks survey scheduled for October 1 will be changed to September 1, with the resulting estimates published in the "Grain Stocks" report released September 29, 1986. This is being done to reduce costs and be in line with the new official marketing year for corn of September 1-August 31. The previous marketing year was October 1-September 30.

- The stocks survey, scheduled for January 1, 1987, will be changed to December 1, 1986. The resulting estimates will be published in the "Grain Stocks" report to be released in mid-January 1987. Also, data collection for stocks, scheduled for April 1, 1987, will be changed to March 1, and issued later that month.

- An adjusted 10-year series of U.S. total stocks has been developed and is published in this report to assist users in shifting data bases to the new reference dates of December 1, March 1, and September 1. (See pages 12-14).

ADJUSTED UNITED STATES STOCKS IN ALL POSITIONS

An adjusted 10-year series of U.S. total stocks has been developed and is published in the following tables to assist users in analyzing future stocks reports and shifting data bases to the new reference dates of December 1, March 1, and September 1. (See page 2 for explanation of reference date changes). These adjusted totals were prepared by commodity specialists in the National Agricultural Statistics Service, the Economic Research Service and the World Agricultural Outlook Board. A brief description of the methods used to develop the data is presented for user information. A more detailed description and additional data will be published by the Economic Research Service in the Wheat, Oil Crops, and Feed Outlook and Situation reports due out in May-August.

CORN AND SORGHUM

To estimate September 1 stocks, a balance sheet approach was taken: September 1 stocks equal June 1 stocks plus June-August imports, less June-August disappearance. Estimates of June-August imports, exports and food seed and industrial use were achieved largely by using reported data, or interpolating from previously reported June-September estimates. June-August feed and residual estimates were interpolated after first correcting for the downward bias in the previously reported June-September feed and residual. In the old balance sheets this bias was caused by ignoring availability of new crop harvested before the start of the new marketing year--previously October 1.

Adjustments to stocks, and to supply and use in successive quarters were carried forward in a manner consistent with the September 1 adjustments. The amount by which the summer quarter use was changed represents estimated use for September. This quantity was shifted from June-September to September-November disappearance, while estimated December use was shifted from October-December to November-February disappearance.

September 1 stocks, plus production, plus September-November imports, less September-November disappearance define the estimated December 1 stocks. Finally, December 1 stocks, plus December-February imports, less December-February disappearance define estimated March 1 stocks.

Since the June 1 stock date will not change, those data remain the same, as previously reported.

SOYBEANS

Total annual soybean production was included in the September-November quarter and monthly crush and export data were summed and reported for respective quarters.

June 1 and September 1 stocks are unchanged. The total feed, seed, and residual figure for the September-May period was derived by summing September 1 stocks and annual production, then subtracting September-May crush and exports as well as June 1 stocks.

Soybean seed use was estimated based on reported annual planted acreage and a national average soybean seeding rate. Feed, seed, and residual use (less the share reported for seed use in March-May) was interpolated for the September-November, December-February, and March-May quarters.

WHEAT

Total annual wheat production was included in the June-August quarter and monthly domestic food and seed use, exports, and imports were summed and reported for the respective quarters. June 1 beginning stocks were unchanged. Feed use was interpolated for the September-November, December-February, and March-May quarters from previous estimates made under the old reporting dates.

CORN stored in all positions on June 1, 1986 is estimated at 4.99 billion bushels (127 million metric tons), 76 percent more than the June 1, 1985 level of 2.84 billion bushels (72.0 million metric tons). Of the total corn stocks on-hand June 1, 1986, 63 percent or 3.14 billion bushels (79.8 million metric tons), was stored on-farms. Farm stocks were 56 percent higher than June 1, 1985 farm stocks. Off-farm stocks, at 1.85 billion bushels (46.9 million metric tons), are up 123 percent from last June 1.

Indicated disappearance from all storage positions during April-May 1986 totaled 956 million bushels (24.3 million metric tons), down 15 percent from the disappearance during the comparable quarter a year ago.

OLD CROP WHEAT stored in all positions on June 1, 1986 is estimated at a record high 1.90 billion bushels (51.7 million metric tons), up 33 percent from the 1.43 billion bushels (38.8 million metric tons) stored on June 1, 1985. Off-farm stocks, at 1.22 billion bushels (33.2 million metric tons), are 64 percent of the total stocks and are up 45 percent from June 1 a year ago. Wheat stored on farms totaled 681 million bushels (18.5 million metric tons), up 17 percent from last June 1. Indicated disappearance from all storage positions during April-May 1986 is 230 million bushels (6.26 million metric tons), off 5 percent from the disappearance during the same period last year.

OLD CROP DURUM WHEAT stocks in all positions on June 1, 1986 are placed at 123 million bushels (3.34 million metric tons), 23 percent more than on June 1 a year ago. Farm stocks total 78.9 million bushels (2.15 million metric tons), up 14 percent from June 1, 1985. Off-farm stocks are placed at 43.7 million bushels (1.19 million metric tons), up 43 percent from last June 1. April-May 1986 indicated disappearance from all storage positions is 13.5 million bushels (366 thousand metric tons), 10 percent less than during the same period in 1985.

A92.15:

SOYBEANS stored in all positions on June 1, 1986 totaled 847 million bushels (23.0 million metric tons), up 39 percent from June 1, 1985 and 79 percent above June 1, 1984. Farm stocks are estimated at 412 million bushels (11.2 million metric tons), 26 percent more than on June 1. 1985. Off-farm stocks, at 435 million bushels (11.8 million metric tons), are up 54 percent from June 1 a year ago.

Indicated disappearance from all storage positions during April-May 1986 totaled 329 million bushels (8.96 million metric tons), 15 percent more than the disappearance for the same period in 1985. Indicated disappearance for the marketing year, at 1.57 billion bushels (42.7 million metric tons), is 10 percent higher than the previous year-to-date utilization.

OLD CROP BARLEY in all storage positions on June 1, 1986 set a record high at 325 million bushels (7.07 million metric tons), 31 percent more than the 247 million bushels (5.39 million metric tons) on June 1, 1985. On-farm stocks totaled a record high for June 1 at 199 million bushels (4.33 million metric tons) and accounted for 61 percent of the total stocks. Farm stocks are 22 percent more than the previous record high June 1 stocks of 163 million bushels (3.56 million metric tons) on June 1, 1985. Off-farm stocks, at 126 million bushels (2.73 million metric tons), are 49 percent more than a year earlier. Indicated dispappearance during this crop marketing year (June 1, 1985 - May 31, 1986) was 512 million bushels (11.1 million metric tons), a decrease of 5 percent from the comparable period a year earlier.

OLD CROP OAT stocks in all storage positions on June 1, 1986 totaled 183 million bushels (2.66 million metric tons), up 2 percent from June 1, 1985. Farm stocks, at 147 million bushels (2.13 million metric tons), are virtually unchanged from a year earlier. Off-farm supplies, at 36.5 million bushels (530 thousand metric tons), are 9 percent more than on June 1 last year. Indicated disappearance during the marketing year (June 1, 1985- May 31, 1986) is 515 million bushels (7.48 million metric tons), 9 percent more than the comparable period a year ago.

SORGHUM in all storage positions on June 1, 1986 totaled 612 million bushels (15.5 million metric tons), 70 percent more than on June 1 a year earlier. Record high June 1 on-farm stocks of 137 million bushels (3.48 million metric tons) were 54 percent more than the June 1, 1985 level. Off-farm holdings, at 475 million bushels (12.1 million metric tons), were up 75 percent. Indicated disappearance from all storage postions for the 1985-86 marketing year to date was 772 million bushels (19.6 million metric tons), up 2 percent from the disappearance of 756 million bushels (19.2 million metric tons) during the comparable period last year.

AGENCY NAME CHANGE

The Statistical Reporting Service staff has been active during the past 3 years examining virtually every aspect of its work. One phase dealt with the Agency's identity within the agricultural and statistical communities. As a result of this study, the name of the Statistical Reporting Service has been changed to National Agricultural Statistics Service. This name more accurately reflects the purpose of the Agency, its broad agricultural focus, and the service aspect of its responsibility. In line with this change, the Agency's Crop Reporting Board has been renamed the Agricultural Statistics Board to better describe the scope of its output.

Requests for a subscription order form covering all available reports should be directed to Agricultural Statistics Board Publications, Room 5829-South Building, USDA, Washington, D.C. 20250 (Phone (202) 447-2021).

This report and other statistical, economic, marketing and news reports are available as soon as possible following release through USDA's EDI SERVICE. For more information, call or write: Russell Forte, (202) 447-5505, OGPA, USDA, Washington, D.C. 20250.

13

RELEASED: September 29, 1986
3:00 P.M. ET

ORIGINAL

OLD CROP CORN stored in all positions on September 1, 1986 is estimated at 4.04 billion bushels (103 million metric tons). Of the total stocks, 2.05 billion bushels (52.1 million metric tons) were stored on the farm and 1.99 billion bushels (50.5 million metric tons) were stored off the farm. The corn marketing year has been changed from October 1-September 30 to September 1-August 31 and this is the first time corn stocks have been surveyed on September 1.

OLD CROP SORGHUM in all positions on September 1, 1986 totaled 551 million bushels (14.0 million metric tons). A little more than 83 percent of the total sorghum stocks are in off-farm positions--460 million bushels (11.7 million metric tons).

****
* NOTICE *
*
* The marketing year for corn and sorghum has been changed from October 1-September 30 to September 1-August 31 resulting in a survey date change from October 1 to September 1.
*
* See pages 12 and 13 for adjusted United States stocks in all positions. This 10 year series has been developed to assist users in shifting data bases to the new reference dates of December 1, March 1, and September 1.
*
* Requests for a subscription order form covering all available reports should be directed to Agricultural Statistics Board Publications, Room 5829-South Building, USDA, Washington, D.C. 20250 (Phone (202) 447-4021).
*

SOYBEANS: The September 1, 1986 carryover of old crop soybeans is a record high 536 million bushels (14.6 million metric tons), 70 percent above last year and more than triple the September 1, 1984 stocks level. Soybeans stored on-farm totaled 167 million bushels (4.55 million metric tons), up 17 percent from September 1, 1985 and account for 31 percent of the soybean stocks stored in all positions. Off-farm stocks, at 369 million bushels (10.0 million metric tons), are more than doubled from a year ago.

As indicated by year-end stocks, disappearance during the marketing year (September 1985-August 1986) totaled 1.88 billion bushels (51.1 million metric tons), 9 percent above last year. Indicated disappearance during June-August 1986 totaled 313 million bushels (8.51 million metric tons), 7 percent more than during the same period a year ago.

WHEAT stored in all positions on September 1, 1986 is estimated at 3.12 billion bushels (84.8 million metric tons). Off-farm stocks, at 1.82 billion bushels (49.6 million metric tons), are 59 percent of the total stocks. Wheat stored on-farms is 1.29 billion bushels (35.1 million metric tons).

DURUM WHEAT stocks in all positions are placed at 177 million bushels (4.82 million metric tons). Farm stocks total 124 million bushels (3.38 million metric tons) or 70 percent of all durum stocks.

APPROVED:

Richard E. Lyng

SECRETARY OF AGRICULTURE

AGRICULTURAL STATISTICS BOARD:
Charles E. Caudill, Chairperson,
L. Duane Jewell, Secretary,
Rich D. Allen, John D. Witzig,
Donald M. Bay, William N. Dowdy,
Craig M. Hayes, George W. Hill,
Gary A. Nelson, James K. Sands,
